

Erika Peralta

We have lived our entire lives without AI. It does not benefit anyone but the billionaires who want to stuff their pockets with more money at everyday people, the environment, and animals expense. The further we allow things like this to be built the farther we push the clock to our extinction. "Only when the last tree is cut. The last fish is caught, and the last river is polluted; when to breathe the air is sickening will you realize, too late, that weath is not in bank accounts and you cannot eat money." - Alanis Obomsawin
