

Elisa McGovern

There is simply not enough water (even for a supposed closed system) in NM, never mind in Doña Ana County. Do you want a surveillance center or green chile? Do you want pollution or clean air? Is it not hot enough for you down there or did you want extra heat from a massive computer system? The people PAID to talk this up are shills. They don't care about New Mexico or its people; they just take a paycheck to sell us all out. This is not a boon for NM. It's a curse. Do the right thing, and stop this before it kills us all.
