

Alyssa Newlin

I am disgusted by your greed. Your capitalist greed, to continue growing your company by ripping off people and destroying our environment. You buy out our government officials and build your throne of money, but you can't drink money. You'll be the cause of your own destruction. Your greed will destroy the very source of your profit because you'll milk it dry until there's nothing left. I hope your data center burns, I hope it's turned into rubble. We don't need data centers. Your only goal is to provide a larger profit to your shareholders. We don't need billionaires, billionaires need us.
