

Esther Louis

"The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably" i agree with this statement from the article. I feel like with the big scheming companies giving influencer money to promote Project Jupiter in a good light, not many people have gotten to see the other side, how Project Jupiter will affect Mexico and if it is a success it might affect the area around it (Ex: USA). In the article it also makes point to say that "If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually." This is totally a good idea because some people aren't allowed or able to go online and learn about this. There should be a public hearing so in English and Spanish and the option to attend virtually to create opportunities for everyone to be able to learn about the destruction that this might bring. There should be total truth so everyone knows whats going, so that the people of Mexico head's are not clouded by the lies that these companies want to spew about Project Jupiter being good for the community. I want to add in that i am a 12 yr child living in the USA and I am very aware of the Earth's deterioration, I am scared for the future of this world and hope that this data center is not made for the sake of my future, for the sake of everyone's future. Global warming is at an all time high and some people still think Artificial intelligence is a good thing. It makes me sad that I know that the Earth is just going to keep getting worse and that the last time to stop it is now. It's sad and disappointing that a young child like me has to speak up, has to worry about their future, has to submit this form just because millionaires want to become billionaires and that billionaires want to become trillionaires. Some people don't understand that to get money is to take away from someone else. PLEASE SAVE THE PLANET. :(
