

# Rebecca Wells

As a New Mexico resident, I am writing to express my strong support for Project Jupiter.

I believe Project Jupiter reflects the kind of responsible investment that can benefit both New Mexico and the communities where it is being built. The project can bring meaningful job creation, long-term economic opportunity, and important support for local schools, infrastructure, water systems, and workforce development.

I also appreciate that Project Jupiter is being designed with advanced technology to reduce water use and protect local air quality.

I respectfully urge the New Mexico Environment Department to approve Project Jupiter.

Sincerely,  
Rebecca Wells
