because of this horrible project things like animals will die. how can we stand by and let the species who first roamed this planet die? literally in the arctic, polar bears are STARVING because of climate change and human beings. we need to stop this horrible project. who cares if thousands of dollars are lost, it's better than thousands of animals which CANNOT come back. do better. PLUS there are PEOPLE with no money, no home, and no WATER. people out there are DYING from dehydration and this project only fuels their death. why do we have to keep on moving back and let people die just because you guys want ai. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
