

Katelyn Orozco

I wish to enjoy my future with a healthy and better planet, and allowing this permit to pass and thus allow for project Jupiter is going to be detrimental to the planet. As an environmental organization, you should be aware that this project poses greenhouse gases that are more than the three biggest cities in New Mexico combined. With this awareness, passing the permit will not only set back New Mexico's climate efforts but destroy a generation's future.

I urge the NMED to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology.
