

Johan Doane

I am a resident of Georgia and we have seen hundreds of these data centers go up and destroy communities in rural Georgia and southern Atlanta. This project will harm the communities and the environment if gone through.

"The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."
