

Noah Greig

Please attempt to stop the building of data centers associated with 'project Jupiter'. Please do not forfeit the rights of the people and protection of the natural world for greed and destruction at the hands of those who will be unaffected by the changes brought about by data centers and ecological destruction. Let the people speak on their behalf, to advocate for their own communities and survival of the environment around them. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.
