

JM Comer

I am writing to express my absolute objection to Project Jupiter, which I believe poses significant and lasting threats to our community.

While proponents point to short-term job creation, the reality is that Project Jupiter will place an unsustainable strain on Dona Ana Countys infrastructure, environment, and public resources. Furthermore, the financial packages being offered including the promised funds for schools, infrastructure, and local organizations like the Boys and Girls Club are nothing more than corporate buy-offs designed to mask the permanent damage this project will inflict. No amount of funding can compensate for the massive depletion and endangerment of our precious local water systems and natural habitats. Our community's future and our natural resources are not for sale. We do not need Project Jupiter, and we do not want it here in New Mexico.

Sincerely, JM
