

## Tegan-Jean Smith

We can not let our environment get hurt by any data centers trying to use our water or air. If this passes everyone in NM will be effected by this in the worse way possible. This can also put children, pregnant women, and the elderly in harms way as their bodies tend to have weaker immune systems, which having poor quality air or water can and will put them at risk of illnesses. Families, friends, and neighbors all deserve to live with clean water and air, so please say no to the data center. Just Say No.
