

Mackenzie Anderson

This is the only planet we have and once the water is gone it's gone so we shouldn't waste it. Water is a precious source of life that needs to be preserved. We also need our air. It is the backbone of human life and our bodies can't survive without it and plants can't regenerate it that quickly.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
