

Phoebe Walsh

It's selfish and greedy. We don't need this data centre, you're ruining our planet to build a center that's going to ruin it more. With the scale of this thing, I wouldn't be surprised if the whole of Mexico is going to be left with no sleep due to the noise and completely unclean water. You're also taking up a lot of habitat space. This isn't a positive at all, you're ruining lives of animals and humans, just so you make people lazier in the world. It's you also ignoring thousands of requests to not build it, you're doing with pure greed. By building this, you may make new Mexico unliveable.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
