

Barbara McGuffey

Please DENY or at minimum DELAY for 60 DAYS the permit approval for Project Jupiter fuel cell technology and hold PUBLIC HEARINGS.

This technology has never been implemented at the large scale proposed for Project Jupiter. The full environmental impacts at that scale cannot be known or quantified. Bloom Energy facts provided and past performance cannot be trusted given their history of violations and fines.

The PUBLIC deserves further information, independent evaluation by experts in the field, and adequate time for PUBLIC HEARINGS and Comments.

I applaud Senators Hamblin, Cervantes, Soules, and Steinborn for championing this issue for the public to request DENY or DELAY.
