

Isabella Williams

Stop project Jupiter!! Please, Dara centers are already ruining our environment enough as it is. I want my children and my children's children to grow up in the beautiful environment that I always dreamed of, but if we continue destroying the land already provided, we'll never have a future. We don't need more data centers, we don't need ai at all. We can survive without chat gpt but we can't survive without running water. If you won't listen to me listen to my unborn children. You claim to be pro life, but you won't protect the planet that the life is being born onto. Please, stop projecting Jupiter. Save the planet, we still have time but not much. Make the right choice, be on the right side of history.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
