We already don't have enough water for humanity, given that many rural areas in south america and africa and asia have access to clean water if water at all. We don't need anyone taking europes or north americas water as well. Climate it just getting worse and AI won't do shit to help. As much as AI can be beneficial, in the hands of mega cooperations and the common man it won't do shit to help. The "benefits" of AI don't outweigh the costs and damages, and they most of the time, don't come ethically. They exploited the weakest and poorest first now they're comming for the middle class, and let me tell you, I highly doubt that the rich will stop when they exploit each other. Do I need to remind you that the the richer majorities are being funded by the goverment to decide against a racial minority? The public, the common working public should get to decide over this in additional 60 days, and if they are in their right state of mind they will see that given the past, the air quality permit should not be permitted. At last it public hearing must be held and it should be in english AND MOST IMPORTANTLY SPANISH cuz undoubtly many citizens are not aware of the issue. Stop this cycle of tyranny. Fuck AI.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
