

Karin Johnson

As a mother and grandmother living here in Doña Ana County, I implore you to deny Project Jupiter any kind of air quality permit. The criminal track record of Bloom Energy should not in any way be allowed to make its deadly mark in our state.

Although Lee Zeldin has made an absolute farce of our national EPA by replacing a commitment to protecting human health and our environment with the goal of industrial development and becoming a world leader in AI- attempting to outstrip the horrific public surveillance system of China- we in New Mexico can Not follow suit!

We must stand for the health & well being of our children and people for the next 7 generations as well as all living beings in our environment.

As my 22 year old Down syndrome son says, "Air, water & earth are all connected. All of Creation is connected in all the galaxies & universe. Help us stay alive."

Please do what is right & not stupid! Then you will rightfully earn our trust & the women & people of this state will stand solidly behind you as you face the "EPA" criminals in Washington.
