

Michelle Hernandez

New Mexico does not need another DATA CENTER. Please listen to our concerns, this is another trend that big billionaires are jumping on for a quick cash grab and you are letting it happen in front of your eyes. We don't need AI and we will continue to THRIVE without AI. Data centers create too much noise, threaten our environment and disrupt our security. There are more negatives to approving this new data center than positives. If AI is so good, then why are millions of people OPPOSED to this new project? Please take action to address our community concerns.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
