

Luke Walters

Please do not allow them to continue with this project. Their air permit should be denied. Our water, air and our lives are at stake. New Mexico has been historically plagued with environmental hazards, from nuclear testing to mining and every thing in between. This place is sacred and beautiful, we do not need anymore environmental hurdles to jump over... the people do not want this built yet they keep sneakily trying to sway public opinion so they can line their pockets while the locals feel the heat, literally. Thank you for your time and consideration.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.
