

Heavenlee esquirell

I am a resident of san Miguel county, as I watch video after video shows statistics of the rio grande drought with years upon years of constant heat waves the thought of having a large scale data center in a vulnarable part of our state is disheartening. Ive suffered through the horrendous wild fires that rained over the northern part of the State and to know that air quality is something that no one should go through Man, woman or child. knowing that our own representative support, this is disheartening. Vote no on project Jupiter if you care fore you citizens

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
