I am a resident of Albuquerque New Mexico and I am asking that you deny yucca growth Infrastructure's air quality permit. I live here with many generations of my family and this is our home. I want to continue living and growing amongst my niece my nephews and my kids to come, I want them to know they have a safe and healthy future We deserve clean air, clean water. That future is under threat with this proposed air quality permit. My families future should be worth much more than the profit and success of an AI dater center who uplifts out of state cooperations.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
