

Michele Chidester

Please don't let them build this. Please don't let them do this to us. They are already putting so much dust in the air and harming the desert. Please don't let them destroy our homes and steal our futures. They will do billions and billions of dollars worth of damage and theft. Please don't let them. The chemicals they will put in the air and water will make the land, animals and people very sick: miscarriages and cancers. A data center this size near people's homes is violent and hateful. It will cook us. Please stop them. Please don't let them destroy our homes and murder our wildlife and steal from us and make us sick. Please.

"The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."
