

Karmia smit

As someone who is apart of the younger generation i am scared to grow up knowing what the world has become. Due to huge data centers being built the wildlife is being put under more pressure and stress causing them to die out faster. The water is getting polluted and used till its dried up. We only have one planet and this is how we're treating it. People only care about moeny until they realise that once our resources are done we cant eat money. Our forests are dying out. Our water is being dried up due to ai. And people still dont care. We have 3 y3ars left till climate change is irreversible. This is the coldest summer we will have for a long time if we dont stand up and do something about the problem. Stop building data centers. We dont need it. You're helping people stop thinking for themselves and dumbing them down. the polar bears are suffering due to our actions. This isnt just our planet its the animals too and they were here before us. So stop being selfish fucks and think about hoe your actions affect others and how it can affect somethi g long term. WE ONLY HAVE ONE PLANET. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County. If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
