

Audrey Carter

"I lived in Albuquerque New Mexico for college starting in 2023. It was a very special and important place for me to live and explore in as a young adult. If this project continues, young people like me will not be able to live in those conditions. UNM was the only college I was able to afford. I would not have gotten a second education without New Mexico. This project not only adds 10 MILLION TONS of carbon dioxide pollution per year, but it has ALREADY negatively affected local farmers. It has created water shortages while that area is already in a drought. Please. I beg you. Do not let New Mexico fall to the same fate as all of these other states that are environmentally beyond repair.

The air quality permit application should be denied because of Bloom Energy's history of illegal dumping hazardous waste. Do you really want a land that is already taken advantage of to be trashed and destroyed more? Approving this permit would be government-sponsored environmental racism. Residents of Doña Ana County are already disproportionately impacted by environmental pollution.

It is your duty to listen to us. Listen to to the children and young adults who are fighting for our lives to make a difference. We are the future. And you are robbing us of a chance in that future if you don't LISTEN"
