I am a resident of Michigan and I demand that you deny Yucca Growth Infrastructure's air quality permit. This permit will bring devastation to the environment, polluting at even greater levels than we already do. The gas plant's toxic emissions and carbon dioxide pollution will unleash suffering on the people, animals, plants, our entire planet. The residents of New Mexico will feel uneasy knowing that the stability of their lives depends on this. Their air quality has already been consistently sub-par and unsafe since 2000. It is unacceptable to invite a new source of hyper-scale air pollution into their communities.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
