I am a 5th generation New Mexican and while I have watched my elders pass, I have been blessed to have heard their stories... why they chose New Mexico as their home, the beauty that we have each experienced in different time periods on the same land and the adventures that span generations which have taken place only because of the beauty we are blessed to live within. This land is important to every single person born here, called to live here or an enchanted visitor. Locals have always cared for the land and that is exactly why New Mexico has remained so wonderful. I urge you to consider this for yourselves while working on passing this project into action. We do not want it. We want YOU to stop it.

Absolutely no one wants this. The jobs are SO temporary and will bleed our land of what we cherish most, our land which is beautiful, captivating and enchanting, our water which is limited but appreciated by every being that lives on the land and our air which used to be one of the cleanest and most cherished parts of us. It is already dirty enough. We need progression. We need our planet more than we need this. We need long term protection for our beautiful state. Not!! Temporary jobs!

At the very minimum please consider,

- The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.
- The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste.
- If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
- Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.

Thank you for your time regarding the community and our opinion on Jupiter Project, as I know I am one in many you hear from.
