

Cynthia Haber

I am a resident of Dona Ana county , I am asking you to deny Yucca Growth infrastructure's air quality permit. A change to fuel cells has minimal impact on the suffering we will endure as a result of gas plant's air pollution. To add 10 million tons of carbon dioxide pollution and a vague estimate of toxic emissions to our active and long time non attainable zone would be nothing short of blatant environmental recidivism. Our metro area is currently 16th worst in the nation, we have received a failing grade on air quality every year since 2000. It is unacceptable to invite anew source of hyperscale air pollution into our communities. Carbon dioxide pollution alone will heat our environment much faster pace and promote the formation of more ground level ozone. In the intense heat ,we have now I am experiencing heat exhaustion, I also hear my neighbors complaining that they too, are experiencing it. My sister who is elderly , can only be outside for a limited time. Even my dogs are feeling, I worry about our wild life . As we create more global warming. Fuel cells create hazardous waste and the fuel cell provider for this project has a history of illegally dumping waste and hiding it .This company will likely do the same here,Dumping,dangerous and undisclosed chemicals into our public lands fills, and we have to wait until someone notices. A fine for illegal dumping doesn't undo damage or it spread into our aquifer and soils are contaminated.It will also not recapture the volatile chemicals released into the air when hazardous waste is improperly stored These Data centers and the private equity companies are only only concerned with profit and their own interest.They claim they are going to to do much to improve our beautiful homeland. But they will Rape our natural resources, our business, our livelihood, our health. We have so much to lose . Please take the time to look at what big , under regulated corporation, have harmed communities in the past.

Please, not here.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
