

Elizabeth Gutierrez

I grew up in New Mexico and attended New Mexico public schools, New Mexico State University and the University of New Mexico law school. I practiced law in Las Cruces and have lived in Doña Ana County for over fifty years.

I am extremely concerned about the emissions that will be discharged by Project Jupiter, especially the nitrogen oxides that have caused so many of us, including me, to develop asthma. Please meet your responsibility to protect New Mexico residents from large emissions of pollutants, including your scheduling a public hearing for all issues and evidence to be fully presented.

Thank you.
