

Ariah Sandle

I respectfully oppose Project Jupiter and urge decision-makers to reconsider moving forward with this project. I am concerned about its potential impacts on the community, including environmental, economic, and quality-of-life effects. Before any further action is taken, there should be greater transparency, more opportunities for public input, and a thorough review of the long-term consequences. I believe the concerns of local residents deserve careful consideration, and I ask that Project Jupiter be stopped until those concerns are fully addressed.
