

Alfred Pike

The direction of industry and artificial intelligence with its factories and data centres is one that should not be taken, it puts not only the environment and ecosystem of the entire planet at risk but the whole of human population. I and many others alike will not stand for gigantic data centres being built in order to support the ridiculous and unethical amount of recourses used to run AI super computers. This has to stop.

New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
