

Jim Graham

I am opposed to the Jupiter AI center as it is currently envisioned. New Mexico is often used as a dumping ground by outside interests. If they want the Jupiter project to be good neighbors they should commit to using renewable energy and storage. It will be less expensive in the long term and is just the proper way to do things, especially in an energy rich area like NM. They should also commit to very low water use by using ground sourced cooling.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Sincerely, Jim
