

Evelyn Zarate

We're already having earthquakes raining, tornadoes during SUMMER of 2026, and it's only going to get worse. We DO NOT have a plan b Earth we can stay at once you've all corrupted the Earth we have now. For what, an ai cooling system that does nothing but take up space, and hurt the environment around it, have you no respect for the people around the community for you guys to continue messing it up for?? They are supposed to be the adults, instead they act like children.
