

Lorraine Brady-Synder

I am a resident of San Marcos California & I oppose Yucca Growth Infrastructure's Data Center. AI data centers use up far too much precious resources for human beings, plants, & animals. Along with that Data Centers create large amounts of pollution that contribute to the destruction of our home. We do not need AI data centers, especially massive ones like these. We are sacrificing our lives, economy, and planet for a technology that barely does anything for anyone. Letting this data centers be built is wrong. There are far too many risks & damages that will be caused if they are allowed to build this.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
