Building this data center will cause mass destruction too many animals in the ecosystem as well as producing toxins into the water used for drinking, this will cause mass health problems to humans and could cause the environment to go into stress from the lack of nutrients and clean water. The center will also pollute the atmosphere with chemicals which will cause the air in the surrounding area to become toxic and will slowly increase the death of humans and the ecosystem. Ai isn't a need, it's ruining and killing our planet. STOP THE BUILDING OF DATA CENTERS.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
