

CONSEJO DE DESARROLLO ECONOMICO REGIONAL NOROESTE

June 24, 2026

To Whom It May Concern:

On behalf of Coder Noroeste, I am pleased to express our strong support and recommendation for Project Jupiter in New Mexico.

As an organization dedicated to regional economic development, innovation, and workforce development in Northwestern Chihuahua, Mexico, we recognize the significant opportunity that Project Jupiter represents for advancing economic growth and strengthening cross-border collaboration throughout our region.

Through our active participation in the Northwestern Chihuahua Economic Development Council, a regional alliance composed of business leaders, educational institutions, government representatives, and community organizations, we work to promote economic competitiveness, attract investment, support workforce development initiatives, foster entrepreneurship, and strengthen strategic partnerships that benefit the municipalities of Ascension, Janos, Casas Grandes, Nuevo Casas Grandes, Buenaventura, and Galeana of Chihuahua. Our efforts focus on creating sustainable opportunities that improve the quality of life and economic prosperity of our communities while building stronger relationships with neighboring regions in the United States.

The historic economic, cultural, and commercial ties between Northwestern Chihuahua and Doña Ana County create a natural platform for cooperation. Project Jupiter has the potential to further strengthen these connections by encouraging innovation, workforce training, advanced industry development, and regional investment opportunities that benefit communities on both sides of the border.

Coder Noroeste strongly supports Project Jupiter and welcomes opportunities to collaborate with stakeholders in New Mexico, including partners in Doña Ana County and throughout the Borderplex region, to advance shared goals related to economic development, innovation, talent development, and regional competitiveness.

We respectfully recommend Project Jupiter and encourage its continued support and advancement as a project of regional significance. We urge the New Mexico Environment Department to approve this important project. We would be pleased to discuss the opportunities for collaboration and the positive impact this initiative can generate for our shared border region.

Sincerely,

Lic. Diego Daniel Bustillos Fuentes
Presidente
CODER NOROESTE
