We do not need anymore data centers. It's honestly cute how the rich assume we're going to stay quiet while they destroy the world. No. We do not want AI. We do not want thousand degrees summers, we want water. We want four seasons. I do not want to live in a world where I work myself to literal death. Instead of building data centers, why don't you donate to people who actually need it. Give that money to people struggling under your power. And if you don't read this? At least my opinion is in someone's hands. Documented. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
