

Nov Suleiman

I am a resident of California and I am asking that you deny Yucca Growth Infrastructure's air quality permit. These centers will release 10 million tons of carbon dioxide annually, which is double or triple the amount released from other major power grids. This is detrimental to our climate and our communities. We do not need fuel that is this unsustainable. Residents of Rio Grande already suffer from pollution, there is no need to subjugate their communities further for such minimal and unnecessary gains; it is blatant environmental racism.
