Why are we trying to contaminate the air more?, we should be trying to stop things as much as possible instead of trying to make it worse, why do you think we were born on Earth? Because it's our home and our only home, and that should be respected especially for the millions and billions of people who DONT want the data centers, we were perfectly fine without them before we can be again.

New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
