I want yo have a safe future for every single one of us living on this planet. I know the circumstances and consequences of the project Jupiter and I plead and insist that this project should be immediately closed down for the sake of our planet. I don't have anything else to say about this. We have to fight for the bright future of our planet and we have to limit the risks of global warming and other environmental disasters to the best of our human ability. Everyone has to understand the fact that our planet is slowly being murdered by humanity.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
