

Anonymous De Guzman

"Provides jobs for thousands of individuals." But destroys the planet where millions live. Are you blind? Dumb? Obtuse? Do you not see the consequences that this project entails for our Earth? What is the point of creating projects like these, providing jobs for people if there will be no one left to take them?

Prolonging the life of our Earth is the real road to success because we are able to further live, create, and build opportunities for one another.

What this project is doing is killing off the seed for that growth. It is already dead before it can even start its journey.

How shameful.

This project will not only effect New Mexico but the world.
