

Wade McMahan

Project Jupiter is a terrible idea for our area and the fact that we're being shut out of some of these meetings is ridiculous. Our water source and environment is way more critical than having a data center. That doesn't create any jobs. In the beginning of building project Jupiter there will be a ton of jobs but as soon as the project is done, it'll be minimized to less than maybe 10 and that saying if any of us will be local working there.
