

H Saron Anglon-Coleman

Just say NO to data centers. This will negatively impact the environment, won't give the number of jobs falsely advertised, and will negatively impact at least people's mental health! We need to protect and restore the environment and not just count of employment when our behaviors could make our cities/towns/state inhabitable.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.

For years, Doña Ana County has been called a 'nonattainment' zone— this means our air quality does not meet federal government rules. Data centers would make our air quality worse!
