

Leslie Nesbit

What I have learned about this project, which most of New Mexicans oppose , is that this data center will increase pollution around vulnerable communities. High schools, day care centers, and the natural environment

Data centers in Atlanta Georgia have polluted the drinking water for families!

Our river has dried up, we are running on reserved water, and they want to build one of the largest data centers in the world in our state? Our air quality is not good now, they want to bring in more air pollution?

Humans lived just fine before AI...

We need to focus on nurturing our land and understand that we aren't the only living beings on this planet. Because we are overpopulated, it is our responsibility to care for the land we live on, not make funny pictures on the internet.
