Please do not sacrifice the well-being of communities and wildlife for unwanted and unnecessary data centres. The money spent on this project could rather be invested into the people whose lives will be negatively impacted by unsafe water, noise pollution, and the impacts of climate change which the data centre will cause.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
