

Roman Rios

I have been growing up my entire life hearing about climate change and what needs to be done to stop it, but over these past 20 years corporations and wealthy individuals who are mostly responsible for the abhorrent treatment of our planet do nothing but make it worse, many of these people will never truly see what the consequences or have to live through them, only those of the younger generations will have to pay that price. Generative AI and the market they're trying to create are completely irrelevant compared to the people who will die or suffer and the near irreversible damage it will bring on, WE DO NOT NEED DATA CENTERS

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
