

Kenneth Reay

Listen to your community! You are sanctioning environmental violence on the a community that is already suffering. For what, a couple thousand dollars. You're greed will lead to people death. Do better for your community. Your life is worth no more than any other human, and to act otherwise makes you evil. 10 tons of pollution, that's what you want. Compromising the water source, the ozone, and the life of your fellow humans.
