STOP PROJECT JUPITER !!! Project Jupiter is a horrible, disgusting proposal and will destroy ecosystems and lives. AI is not needed and we are completely fine and capable of living without it. Data Centers are horrible and use up so much water which terribly harms communities. They cause pollution and global warming, contributing to the endangerment of polar bears. This project needs to be stopped. The public should be given an additional 60 days to review and comment on the air quality permit, so that community members can participate equitably. The air quality permit application should be rejected due to Bloom Energy's history of illegally dumping hazardous waste. If the permit is not rejected, a public hearing must be held in Santa Teresa , in both English and Spanish, with the option to participate online. Approving this permit would be government-backed environmental racism , because the people of Doña Ana County already suffer too much from environmental pollution.
