

Annon Annon

Project Jupiter sounds like a horrible idea. Why can't we use that land for farms or shelters or literally anything that will actually help people. All data centered do is take up space and pollute our air and water.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
