

Hannah Witowski

I am a New Mexico resident of over twenty years, and I strongly urge the Environment Department to reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. Project Jupiter would have a severely negative impact on our community and our ecosystem, which is already vulnerable and fragile. Their failed greenwashing attempts cannot change the fact that Bloom Energy has an extensive history of illegally storing, transporting, and dumping hazardous waste - the construction of this power plant is guaranteed to contaminate the environment with toxic pollutants and high levels of greenhouse gases, and reducing everyday quality of life.
