Project Jupiter is a disgusting waste of community water that serves no real benefit to the people. We do not need AI and all these centers do is produce more carbon dioxide that heats up the earth and pollute communities with constant noise. Additionally they take up drinking water to cool. WE DO NOT NEED AI.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
